

What is the technic you are going to use in the spring for your multiplication?

WHY SHOULD YOU CHOOSE FERTISS ?

- To spare some time on cutting and repotting
- For a high success rate and a good-quality cutting
- For a better sprout when repotting and for the repotted products to be homogeneous.

A LARGE RANGE

9 plug sizes and 16 trays.

References specific for horticulture:

- FERTISS 2x4 in trays with 150 cells
→ Small cuttings and short cycles: Bidens, Bacopa, Sanvitalia...
- FERTISS 3x3 in trays with 104 cells
→ Ivy Geranium, Petunia, Scaevola, Fushia...
- FERTISS 4x4 in trays with 54 alvéoles
→ Large cuttings or parent-plants : Geranium Zonale, Lantana, Dipladénia...
